# Newspapers name chief for IS unit

**By David Hoye**
The Arizona Republic

In a show of its commitment to technology, Phoenix Newspapers Inc. has assigned Howard Finberg to oversee the company's information services department for the next 18 to 24 months.

Finberg, who has served as PNI's director of information technology since September, will combine his new duties with his existing role to maintain the Phoenix-based newspaper company's position on the technology fast track.

"I've had the strategic view of technology and its importance to the company," Finberg said. "The goal now is to get us in a position to go into the next century, and to use technology to better serve our customers."

Howard Finberg

PNI, which publishes *The Arizona Republic* and the *Arizona Business Gazette*, has a long history of using technology to produce better products and services.

The company was one of the first to publish daily newspapers using a totally computerized writing, editing and page-design system, and it became one of the first to offer customers information online in its Arizona Central information source on both America Online and the Internet's World Wide Web.

Finberg plans to continue adding to that by helping PNI's employees work more efficiently and better serve their customers by, among other things, using technology to provide readers with more information specific to their own neighborhoods and to plan for successful expansion into the east Valley.

"This decision reflects PNI's need to continue its transformation to an information company with newspaper publishing at its core," said John Oppedahl, PNI's publisher and chief executive officer.

"In essence," he said, "we are restructuring the information services department to address some of our operational challenges and provide better service to all PNI departments."

In his new assignment, Finberg will report to Rich Cox, PNI's vice president for operations and product development.

"A tremendous amount of new technology has been launched at PNI over the last 2½ years," Cox said. "We need to continue to build our technical expertise."

Finberg has worked at PNI for nearly 10 years, serving in a variety of management-level positions.
